Creating an Anesthesia Pre Evaluation Note - 2017

The Anesthesia Pre Evaluation Note Uses Multiple Panels and the Anesthesia Summary Report can be displayed as a panel on the Left or Right of the screen. The Pre Eval note itself is also displayed in a separate panel.

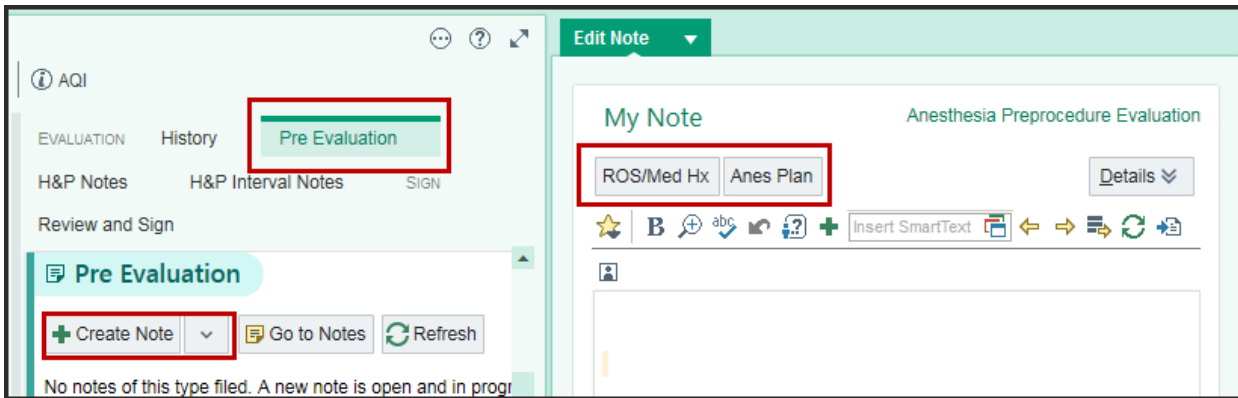

To create the note click on the Pre Evaluation section in the Pre Activity.

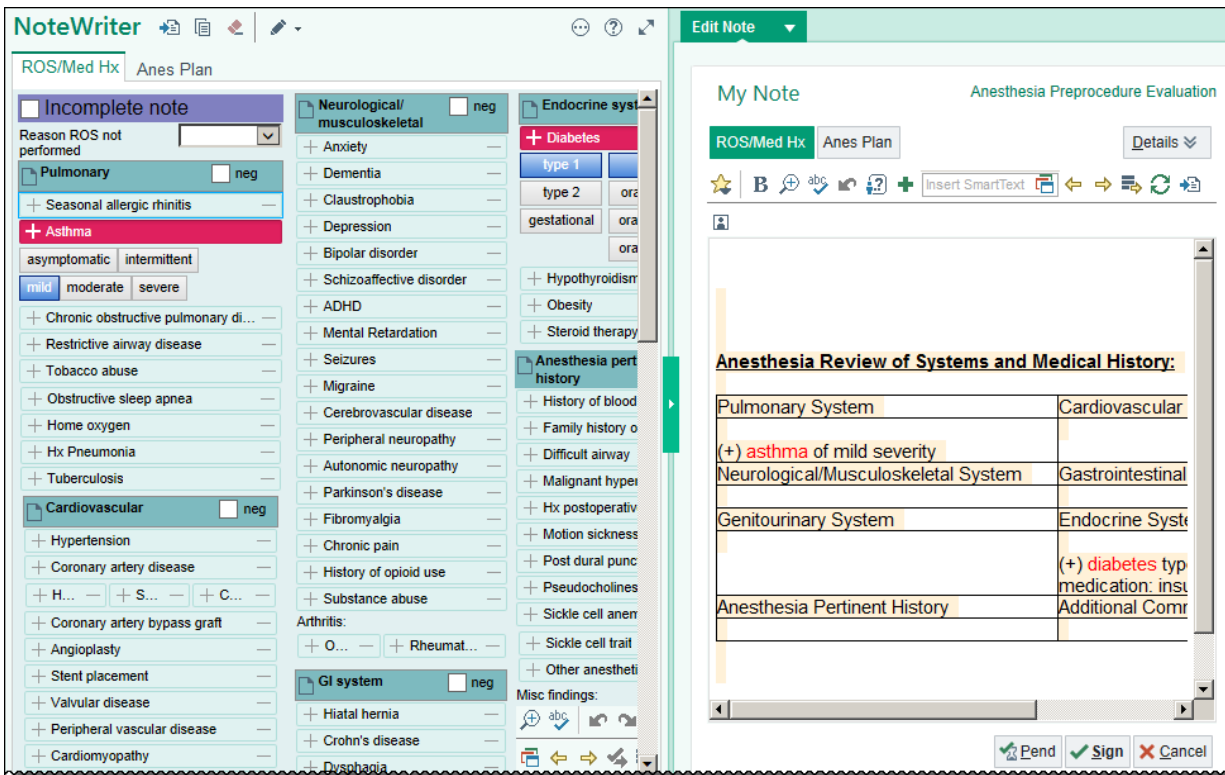

Under the Pre Evaluation header click the **Create Note** button and select template you need:

Next, enter your documentation under the **ROS/Med Hx** and the **Anes Plan** tabs.

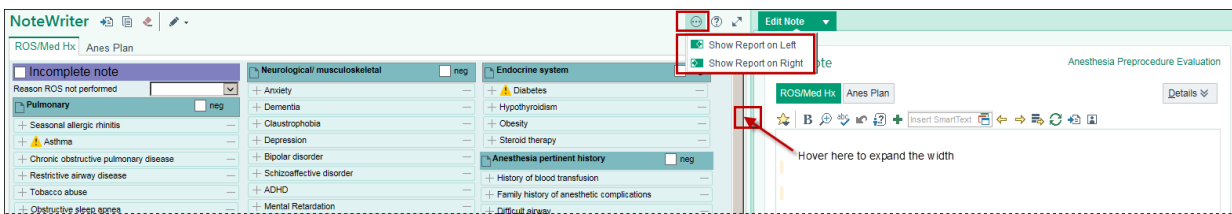

When the ROS/Med Hx tab is selected the **entry screen** is displayed in the **left hand panel** and the **Note itself** is displayed in the right hand panel.

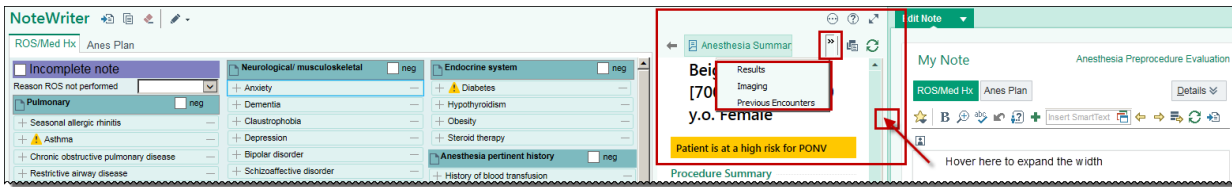

When the Anes Plan is selected, the entry form appears in the left hand panel and the Note appears in the right hand panel.

You can also display the **Anesthesia Summary Report** by clicking the **Actions** icon  and choosing to Show the Report on the Left or Right.

As an example, with the Summary displayed on the right, the width of the report can be expanded by hovering over the bar between report and the note and dragging it to the left.

When the documentation of both the ROS/Med Hx and Anes Plan tabs has been completed, the note can be **Signed**.
